

| Story # | Story Description   | Acceptance   |
|---------|---|--|
| S01     | As a student,<br>I want to be able to Create Projects (Name projects, upload documents, add text, images, reflections, and tag project) I have done,<br>So I can provide evidence to potential employers. | Given the user has logged in<br>When the user selects "create new project"<br>Then they can: Name the project, Upload documents, Add text, Add images, Add reflections, Tag the project                    |
| S02     | As a student,<br>I want to provide evidence for work (Add Text to Projects) I have done,<br>So I can show potential employers.  | Given the user is logged in and selected a project<br>When the user selects edit project<br>Then the user can write text to add to a project   |
| S03     | As a student,<br>I want to provide evidence for work (Add Pictures to Projects) I have done,<br>So I can show potential employers.  | Given the user is logged in and selected a project<br>When the user selects edit project<br>Then the user choose a location to upload a picture  |
| S04     | As a student,<br>I want to reflect on work I have done,<br>So I can improve myself and my work.   | Given the user is logged in and selected a project<br>When the user selects edit project<br>Then the user can add a written reflection to the project  |
| S05     | As an employer,<br>I want to be able to find a potential employee,<br>So I can see examples of their work.  | Given the user is or isn't logged in<br>When the user selects "search users"<br>Then they can input a user's id to be directed to the user's projects  |
| S06     | As a user with projects,<br>I want to be able to find specific projects easily,<br>So I can edit them.  | Given the user is logged in and has existing projects and is on their profile page<br>When the user selects views their projects<br>Then the projects are displayed in an intuitive way                    |
| S07     | As a user,<br>I want to structure my projects in an intuitive way,<br>So I can organise my portfolio easier.  | Given the user is logged in and is either editing an existing project or is creating a new project<br>When the user selects tag project<br>Then the user can add arbitrary or existing tags to the project |
| S08     | As a user,<br>I want to upload files to a project,<br>So I can demonstrate the work I have done.  | Given the user is logged in and is either editing an existing project or is creating a new project<br>When the user selects upload file<br>Then the user can upload a file to the given project            |
| S09     | As a user,<br>I want to personalise my profile,<br>So I can express my individuality.   | Given the user is logged in<br>When the user selects edit profile<br>Then the user can adjust their Bio and Name   |
| S10     | As a user,<br>I want to create a profile that is secure,<br>So I can store my projects.   | Given the user has an account<br>When the user uses the website<br>Then the user must verify their account, and can only edit projects and information that they own                                       |
